

## DANGER LURKS IN EVERY ONE OF US

We Are As Full of Deadly Poisons As A Germ Laboratory.

## AUTO-INTOXICATION OR SELF-POISONING

"FRUIT-A-LIVES" Absolutely Prevents This Dangerous Condition.

The chief cause of poor health is our neglect of the bowels. Waste matter, instead of passing from the lower intestine regularly every day, is allowed to remain there, generating poisons which are absorbed by the blood.

In other words, a person who is habitually constipated, is poisoning himself. We know now that *Auto-intoxication*, due to non-action of the bowels, is directly responsible for serious kidney and bladder troubles; that it upsets the stomach, causes indigestion, loss of appetite and sleeplessness; that chronic rheumatism, gout, pain in the back, are relieved as soon as the bowels become regular; and that pimples, rashes, eczema and other skin affections disappear when "Fruit-a-lives" are taken to correct constipation.

"Fruit-a-lives" (or Fruit Liver Tablets) will protect you against Auto-intoxication.

50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent on receipt of price, by FRUIT-A-LIVES Limited, OGDENSBURG, N. Y.

## BRITISH ARE EAST OF LENS

Over 4000 Prisoners Taken by Them Yesterday.

London, Oct. 4.—The British, pursuing the retreating Germans in the Lens region, have reached the railway east of Lens. Field Marshal Haig announced today. Southeast, the British have made progress between Oppy and Mericourt. Over four thousand prisoners were taken yesterday by the British in operations north of St. Quentin.

## WAR ON MOSQUITOES

National Mosquito Fighting Army Has Been Created.

Washington, Sept. 28.—More than one ally of the German emperor who has attempted to interfere with the shipbuilding program has come to defeat. The latest is the mosquito. Most of the new shipyards have risen from marshlands bordering rivers, lakes, bays and inlets. These marshy places are the favorite breeding places of the mosquito and millions fed so voraciously on the men hammering out ships that, at times, they were forced to leave the ways and production was retarded. But now a great, national mosquito-fighting army has been created and this force is conducting a continuous offensive against the insect hosts.

The staff of this army is composed of mosquito fighting experts, who have fought and battered down mosquito offensives not only in this country but also in the fever-infected tropical zone where the pests have been at their worst. Among these is Lt. Col. Philip Schuyler Doane, a member of the staff of Surgeon-General Gorgas, who eliminated the pest from the Panama Canal zone. He is director of the department of health and sanitation of the United States Shipping Board and is organizing the war against the mosquito in all parts of the country.

The co-operation of municipal and private corporate interests has been enlisted in this war. Miles of trenches have been dug in lowlands about shipbuilding plants so that the marshes may be drained and the breeding places destroyed. Where it is impossible to drain off the stagnant water, silling is resorted to.

At the Hog Island plant near Philadelphia, the work is being carried on with the co-operation of the state of Pennsylvania, the city of Philadelphia, the Westinghouse corporation, the Atlantic Oil Refining company and other private interests. A fund of \$250,000 has been contributed and in addition the Atlantic Oil Refining company contributes all the oil used. 9,100 acre tract of marsh land had to be treated by sprinkling pools, cutting down tall reeds, dredging and draining and within three months after work started, the water area had been reduced 95 per cent. Several big dumping stations have been erected and employed in this work and more are planned.

Three thousand or more acres of the land thus reclaimed, it is estimated, will be suitable for agricultural purposes and it has been suggested that this land be turned over to the Boy Scouts of Philadelphia for war gardens, as the land is within six miles of the central section of Philadelphia.

The state of New Jersey is co-operating with Camden and Gloucester counties and the Shipping Board in work about the shipyards on the New Jersey side of the Delaware river. It is planned to spend \$10,000 in this district this year.

Chester, Va., an important center for all kinds of war work, has a committee that is working with the state and the Shipping Board and the state has agreed to appropriate \$40,000 if \$60,000 can be obtained from other sources. Other places at which work is being carried on along this line, are Wilmington, N. C., which has raised \$30,000; Alexandria and Hampton, Va., Los Angeles, Calif.; and about the yards on the Gulf of Mexico.

## DUNDEE SEES

### BASEBALL GAME

Account of First Game Ever Played in That City Is Interesting Though Oddly Warped.

The following is a clipping from a Dundee, Scotland, newspaper, describing the first baseball game ever witnessed in that city. The clipping was sent to William McDonald by his sister who resides in Dundee. The writing seems unique to those accustomed to the baseball phraseology of this country.

"It is a fast and scientific game, and there are heaps of room for it in this country."

"Judging from the talk at Dens Park, Dundee, yesterday afternoon that was the general verdict respecting baseball. Over 8000 persons had assembled to witness the match between teams representative of the

Eastern and Western United States, and at frequent intervals they expressed their appreciation and interest by loud cheering. This was the third big baseball match played in Scotland, and it was unique in this respect, that the men of both States had something at stake. They were not merely playing an exhibition game, as was the case in Edinburgh and Glasgow; they were in deadly earnest, and at times the excitement was as great as at a football derby. The reason for the keenness of the rivalry was that they were both undefeated champions of their respective army districts while training on the other side of the Atlantic for the benefit of the Hun. Neither team had tasted defeat, and this was the occasion of their first meeting, and both were determined to secure victory. The members of the crowd got more than their money's worth. They had the pleasure of witnessing eighteen men of splendid physique battle as though their lives depended upon success, and, incidentally, it is worthy of mention that one of the officers in charge of the men informed a representative of "The Post Sunday Special" that the virile manhood of those whom he will soon lead into the sternest struggle had mainly been built up by their attention to baseball, which they had played almost since the first day they had been able to walk.

As for the game itself, it fails to be recorded that the men of the Golden West beat their Eastern opponents by 10 runs to 3. This was a surprise finish, for it appeared at the start that the home boys of New York, Boston, and adjacent towns were to have pretty much their own way. They forced three runs in the first inning, and it was not until the sixth inning that the Westerners got into a score again. Excitement was very keen. Everybody wanted to see the bats from the orange groves of California and neighboring states get a run, and when Presley smashed out a terrific hit there was a roar of delight. Presley as the result of that wallop, made a three-bagger—that is, he himself reached the base next to the home plate; but, what was of more importance, before the innings finished, the Westerners had four runs to their credit, and were thus on the lead. After this success the Westerners never looked back, and despite great efforts of the frequenters of Broadway they ran out winners by the big score already noted, final details being:—  
Western States 0-0-0-0-4-12-10  
Eastern States 3-0-0-0-0-0-3  
How Dundee men marvelled at the speed with which the ball was thrown by the pitchers and also the control

The First Bottle of **PERUNA**

Gave Relief so Writes

Mr. M. VanBuren, Engineer, G. R. & L. Ry. 17 Highland St., Grand Rapids, Mich.

Entirely Free from Catarrh of the Stomach

"Peruna has positively done for me what many doctors failed to do. I have been time and again compelled to take to my bed for days. The first bottle of Peruna gave relief and while I always keep it in the house for emergency, I consider myself entirely free from catarrh of the stomach, the trouble from which I suffered for so long before taking this remedy."

Liquid or Tablet Form Sold Everywhere. Ask Your Dealer

they exercised over it. Stewards for the Western team, was particularly good, and to his wonderful ability at making the ball swerve in its flight was largely due the fact of his side's triumph. The holding also opened wide the eyes of the spectators. In this respect baseball has cricket beaten to a frazzle. The men seemed to move with the speed and accuracy of machines, and, no matter how high, how fast, or how far the ball was struck, they seldom or never failed to catch it in running between the bases the players displayed a striking celerity and one could not fail to marvel at the quickness that baseball calls for from those who would be-

## Sergt. Brown took 159 German Prisoners

There are two and a half million American soldiers with Sergt. Brown's spirit; but they must be uniformed, equipped, fed, trained, transported and kept across until the Huns run to cover and beg for a chance to repent, reform and repay. The Hun is on the run. Keep him going.

Liberty Bonds, bought by a willing people, have made it possible to organize, clothe, equip, feed and place the *deciding army* in the field. Our task is not done though well begun. More men, more ships, more guns, more planes, more *everything* are needed to win the war.
